

VEENA GODUGU

Nandyal, Andhra Pradesh, India | +91 7981907259 | goduguveena@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

SUMMARY

Final-year B.Tech CSE (Data Science) student progressing from Python/SQL data-science foundations into cloud-based data engineering. Hands-on with Azure Virtual Machines, Apache Kafka pipelines, and Snowflake cloud data warehousing alongside proven ML delivery (96.5%-accuracy predictive maintenance model) and full-stack development. Fast learner and community leader targeting Data Engineering, Cloud, and AI/ML roles.

EDUCATION

B.Tech, Computer Science & Engineering (Data Science)

CGPA: 8.77 / 10

Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal

2023 – 2027

SKILLS

Programming Languages: Python, Java, SQL

Cloud & Data Engineering: Microsoft Azure, Azure Virtual Machine (VM), Cloud Computing, Apache Kafka, Data Pipeline, Data Ingestion, Data Processing, ETL/ELT, Cloud Data Warehouse, Snowflake

Machine Learning & AI: Machine Learning, Deep Learning Fundamentals, Generative AI, Predictive Modeling, Model Evaluation & Optimization

Data Analysis & Libraries: NumPy, Pandas, Scikit-learn, Exploratory Data Analysis, Statistical Analysis

Web & API Development: HTML, CSS, React.js, Flask, REST API Design

Database Systems: MySQL, PostgreSQL, SQL Server

Tools & Core CS: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, OOP, DBMS, Data Structures & Algorithms

PROJECTS

1. Smart Predictive Maintenance System (Industrial IoT)

[GitHub Repo](#)

Tech Stack: Python, Scikit-learn, Pandas, Flask, React.js, SQL (SQLite), Git

- Engineered an ML-based predictive maintenance pipeline achieving **96.5% prediction accuracy** for industrial equipment failure detection.
- Built a **Flask REST API** and **React.js dashboard** with an integrated RUL (Remaining Useful Life) prediction model for real-time monitoring.

2. Cloud Data Engineering Pipeline — Microsoft Azure, Apache Kafka

- Provisioned and configured an **Azure Virtual Machine** to set up and run **Apache Kafka** and supporting data-engineering tools, avoiding time-intensive local installation workflows.
- Explored data ingestion and pipeline workflows in a cloud environment, gaining hands-on understanding of how **cloud-based data-engineering infrastructure** moves and processes data end-to-end.

3. Tutor Live – Real-Time Faculty Selection & Subject Allocation System

Tech Stack: ASP.NET Core 8, Razor Pages, C#, Entity Framework Core, SQL Server, JavaScript, Azure

- Designed and deployed a real-time faculty allocation system formally adopted by the **CSE (Data Science) Department, RGM CET**.
- Implemented concurrent, live seat-allocation logic supporting **hundreds of simultaneous users with zero downtime**.

EXPERIENCE

AI Engineer Intern | Oscowl AI

Mar 2026 – Jul 2026

- Worked on AI voice synthesis, integrating and validating **EnCodec** token generation with vocoder models.
- Conducted model testing, debugging, and optimization across speech-generation pipelines.

Web Development Intern | ByteHearts

Aug 2025 – Oct 2025

- Developed responsive web applications using **HTML, CSS, and JavaScript** with Git-based version control workflows.
- Improved UI responsiveness and collaborated on end-to-end feature development.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Snowflake University — **Data Platform Badge:** cloud data warehousing & modern data-engineering fundamentals.
- Introduction to AI – Google (Coursera)
- Oracle Certified Professional (Data Science)

ACHIEVEMENTS

- Community Organizer** — Google Developer Groups (GDG) On Campus, RGM CET
- Program Facilitator** — Google Cloud Arcade Facilitator '26
- Poster Presenter** — PyCon India 2025 — “Qubits Meet Heartbeats”
- Hackathon Winner** — SQL Hackathon
- Club Lead** — SHIELD Prep — Departmental Club
